Case 7903M

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In the application of :  
ROBERT I. NURSE : Confirmation No.: 5236  
Serial No. 09/755,408 : Group Art Unit: 3727  
Filed January 5, 2001 : Examiner: S. J. Castellano  
For SELECTIVELY REINFORCEABLE CONTAINER

**PETITION UNDER 37 CFR 1.181 TO**  
**WITHDRAW THE EXAMINER'S HOLDING OF ABANDONMENT**

Mail Stop Office of Petitions  
Commissioner for Patents  
P. O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

The Commissioner is hereby petitioned under 37 CFR 1.181 to withdraw the Examiner's holding of abandonment of the above-identified case for an alleged failure to timely respond to the Final Office Action mailed by the PTO on August 5, 2003. Applicant believes that there is no fee required with the filing of this petition; however, the Commissioner is hereby authorized to charge payment of any fees associated with this communication, including fees required to make any additional copies of this petition, to Deposit Account No. 16-2480.

RECEIVED  
MAR 02 2004  
TECHNOLOGY CENTER R370

### REMARKS

With respect to the above-identified application, Applicant submits that the Examiner's holding of abandonment is erroneous for the following reasons:

1. On August 11, 2003, Applicant received a Final Office Action mailed by the PTO on August 5, 2003 (copy enclosed). Applicant filed a 9-page response (including the cover page) to the Final Office Action on October 6, 2003 (October 5 being a Sunday) via facsimile to the number listed in the Final Office Action. Applicant also submits herewith a copy of the Auto-Reply Facsimile Transmission confirming that Applicant's response had been received successfully by the PTO on October 6, 2003.

2. Applicant responded in a timely manner to the Final Office Action mailed by the PTO on August 5, 2003. Applicant filed said response within a two-month time period pursuant to M.P.E.P. §706.07(f). When Applicant did not receive an Advisory Action from the Examiner, Applicant checked Public Pair on the Internet and discovered that the Response filed by Applicant on October 6, 2003 had not been entered into the file history of the instant application.

3. Due to the failure of the Office to enter Applicant's timely response to the Final Office Action, no advisory action was forthcoming and the time period in which to reply to said Final Office Action has expired. The instant application now stands as abandoned.

4. Applicant has no history of failure to prosecute the above-identified application, as indicated by a review of Applicant's file record (copy enclosed).

In view of the foregoing, Applicant seeks favorable action by the Commissioner to reverse the Examiner's holding of abandonment of the above-identified application. Accordingly, Applicant respectfully requests that the August 5, 2003 Final Office Action be viewed as having been responded to in a timely fashion and that the processing of the application to issuance be continued.

Respectfully submitted,

ROBERT A NURSE

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☐ Responsive to communication(s) filed on \_\_\_\_\_.

2a) ☒ This action is FINAL.

2b) ☐ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) ☒ Claim(s) 1-5, 8-14, 16, 17 and 21-34 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.

6) ☒ Claim(s) 1-5, 8-14, 16, 17 and 21-34 is/are rejected.

7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.

8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

Application Papers

9) ☐ The specification is objected to by the Examiner.

10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.

12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) ☐ All b) ☐ Some \* c) ☐ None of:

1. ☐ Certified copies of the priority documents have been received.

2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.

3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) ☐ The translation of the foreign language provisional application has been received.

15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

6) ☐ Other:

RECEIVED  
MAR 02 2004  
TECHNOLOGY CENTER R3700

Applicant has defined the term "strut" to be broader than the word "panel" by stating that the strut 42 may be disposed in the form of a panel (see specification page 6, lines 15-23 and drawing Fig. 2-5). As noted by applicant, the applicant is allowed to be his own lexicographer. For this application, the term "strut" is understood to include a panel. Therefore, any reinforcing panel shown by a reference will read on a strut as claimed by applicant.

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on March 23, 2003 and resubmitted on June 30, 2003 have been disapproved because they introduce new matter into the drawings. 37 CFR 1.121(a)(6) states that no amendment may introduce new matter into the disclosure of an application. The original disclosure does not support the showing of the narrow strip designating a strut 42 and the rounded end 46 as shown in Fig. 6 and 7. Note that the strut reinforcement shown in Fig. 6 and 7 now adds a showing of the narrow width of strut 42, adds a showing of a central point of attachment to floor support pan 48, adds a showing of a different radius of curvature of the outwardly extending edge of the distal end 46 and adds a showing of a distal end 46 which is not perforated and abuts between two downwardly extending projections on an upper outwardly extending flange of the side walls 20.

Note that the substitute specification contains two different brief descriptions of Fig. 3.

The substitute specification filed March 23, 2003 and resubmitted on June 30, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The first three lines of paragraph No. 27 on page 6 which has been changed to discuss

Art Unit: 3727

reinforcement 40 rather than strut 42. Reinforcement 40 includes floor support pan 48, reinforcing panels or struts 42 and distal ends 46. The whole meaning of the second sentence of paragraph 27 is changed by discussion with respect to the reinforcement 40 rather than the strut 42. The substitute specification has not been entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 10-13, 16, 17, 21-24, 28-31, 33 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Nichols and Artusi.

Nichols discloses a container comprising an inner tank (30) and outer container (11), the container having a plurality of upstanding sidewalls (sidewalls of inner tank 30) interconnected by a floor pan (floor of inner tank 30), at least one pair of opposing sidewalls being reinforceable with removable reinforceable panels (sidewalls 20 and 22 are removable from attachment to the inner tank 30), the reinforceable panels being reversibly transformable between a first upright position up against the sidewalls of inner tank 30 where they reinforce the sidewalls and a second folded position where they do not reinforce the sidewalls of inner tank 30, the reinforceable panel being removable from the sidewall without separation from the container, the bottom wall 12 defines a floor pan support, each reinforceable panel is articulably joined by a hinge to the sidewall about a bottom proximal end juxtaposed with the floor pan. The struts of claims 1-4, 10-13, 16 and 17 are defined by the reinforceable panels.

Art Unit: 3727

Artusi discloses a container comprising an inner tray (2) and outer blank (1), the container having a plurality of upstanding sidewalls (sidewalls of inner tray) interconnected by a floor pan (floor of inner tray), at least one pair of opposing sidewalls being reinforceable with removable reinforceable panels (sidewalls 7 or 8 are removable from attachment to the inner tank 30), the reinforceable panels being reversibly transformable between a first upright position up against the sidewalls of inner tray where they reinforce the sidewalls and a second folded position where they do not reinforce the sidewalls, the reinforceable panel being removable from the sidewall without separation from the container, the bottom wall 4 defines a floor pan support, each reinforceable panel is articulably joined by a hinge to the sidewall about a bottom proximal end juxtaposed with the floor pan. The struts of claims 1-4, 10-13, 16 and 17 are defined by the reinforceable panels.

Claims 1, 10-13, 21 and 28-31 are rejected under 35 U.S.C. 102(b) as being anticipated by British reference No. ('514) to Harrison.

Harrison discloses a container comprising a plastic inner container (10) and outer cardboard case (26), the container having a plurality of upstanding sidewalls (sidewalls of inner container 12-18) interconnected by a floor pan (base 20), at least one pair of opposing sidewalls being reinforceable with removable reinforceable panels (sidewalls 28 and 32 or 30 and 34 are removable from attachment to the inner container), the reinforceable panels being reversibly transformable between a first upper position up against the sidewalls of inner container where they reinforce the sidewalls and a second lower position where they do not reinforce the sidewalls of inner container, the reinforceable panel being removable from the sidewall without separation from the container, the bottom wall 36 defines a floor pan support.

Art Unit: 3727

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 8, 9 and 25-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nichols or Artusi in view of Harrison.

Nichols and Artusi disclose the invention except for the tab/slot arrangement. Harrison teaches the tab/slot arrangement with tabs on the sidewall and slots on the reinforceable panel/strut. It would have been obvious to modify the mesh construction wall of Nichols to accept tabs placed on the sidewall of the inner tank to secure the sidewall and reinforceable panel strut. It would have been obvious to modify the reinforceable panel/strut of Artusi to have slots to accept tabs placed on the sidewall of the inner tray to secure the sidewall and reinforceable panel strut. A securement would be motivated by a need to minimize movement of the sidewall with respect to the reinforceable panel/strut to prevent wear and by a need to align the reinforceable panel/strut to properly reinforce the sidewall. The notches claimed read on the slots which can be gripped. It would have been obvious to add additional slots in order to improve grip and handling of the reinforceable panels/struts.

Claims 14 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Artusi or Harrison. Artusi and Harrison each disclose the invention except for the cardboard is not fluted cardboard. Fluted cardboard is well known. It would have been obvious to substitute fluted cardboard for non-fluted cardboard in order to improve buckling strength of the cardboard.

Art Unit: 3727

Applicant's arguments filed June 30, 2003 have been fully considered but they are not persuasive. Applicant remarks in response to the Nichols reference: Surely, an inner tank made of thin wall construction that is incapable of supporting itself upright cannot be considered a container having a plurality of upstanding struts. This statement is conclusionary and is not based upon any supporting evidence. If a sidewall is not substantially thick to support itself in an upright manner but relies on reinforcement to maintain an upright configuration, the sidewall is still upright in orientation. The strut or reinforcement panel in Nichols is the sidewalls 20, 22 of the outer container 11.

Although the rim 14 (15 as shown in Fig. 2) is joined to edge strips 9 and 10 in Artusi, the joint is removable even if the joint is (1) adhered wherein the adhesive can be dissolved by a dissolving agent, (2) welded, melted or fused wherein the joint can be heated to the melting point then the parts separated, or (3) fastened by some mechanical fastener wherein the fastener components can be disassembled or detached.

Applicant mentions the fusing of a container and outer case in Harrison. The examiner can't find any reference to fusing or melting. The engagement of the projections 38 within holes 40 is reversible and the container is detachable from the outer case and the strut is removable from the sidewall.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3727

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Castellano whose telephone number is 703-308-1035. The examiner can normally be reached on M-Th 6:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lee W. Young can be reached on 703-308-2572. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
